SUMMARY

Final-year Computer Engineering student with 12+ months of industry internship experience building production-grade digital platforms. Proficient in Python, SQL, and data analytics, with hands-on AWS cloud experience and a strong foundation in SDLC and Agile delivery. Built fintech projects including a quantitative finance platform with market data pipelines and an ML-based fraud detection system at a Union Bank hackathon.

PROFESSIONAL EXPERIENCE

Software Developer Engineer Intern , Druve Media Pvt Ltd (druvemedia.in)

Aug 2025 - Jan 2026

- Architected and shipped a production-ready society management system, an analytics dashboard board for monitoring realtime cashflow and subscription trends by utilizing existing API's.
- Designed a reusable component library in React that cut frontend dev time for new features by roughly 40%, adopted across the engineering team.

Software Developer Engineer Intern , EternIQ Pvt Ltd (eterniq.in)

Jan 2025 - Jun 2025

- Optimized client-side bundle and rendering pipeline of a React + Node.js web app, delivering a 40% reduction in load time (measured via Lighthouse) .
- "Delivered 6 end-to-end features across 5 Agile sprints in a cross-functional team - 100% sprint completion rate.

PROJECTS

Artisy - Ecommerce Platform for Artisans artisy.in | [Github Repo](#)

- Built and maintained Artisy, a TypeScript-based application with a polished front-end and modular architecture.
- Implemented core product features and application logic, contributing to a codebase composed primarily of TypeScript (90%+) with supporting PL/pgSQL for backend/data workflows.
- Worked across the full stack to ship production-ready features, balancing frontend experience with backend reliability.

OverSightAI - Enterprise AI & Data Governance Control Plane oversightai.in | [Github Repo](#)

- Delivered a centralized governance dashboard giving enterprises real-time visibility into how AI agents consume organizational data, built on open-source tools (DataHub, Keycloak, Langfuse) with RBAC and audit-trail support.
- Reduced manual governance review effort by automating risk-scoring across agent interactions, enabling teams to flag policy violations without human triage for low-risk event

Fraud Observation & Monitoring Operations (FOMO)

- A system that actively observes, monitors, and flags suspicious or fraudulent activities in real-time, ensuring secure e-commerce transactions and account integrity.
- Built modular backend services using Django and FastAPI, exposing RESTful APIs for transaction ingestion, risk scoring, and alert management.
- Built at **PSB's Series iDEA Hackathon by Union Bank of India**

[Other Projects @ abhishekthormothe.in/projects]

SKILLS

- Data & Analytics: Python, SQL, MS Excel Advanced, PowerBI
- DevOps: AWS (EC2, S3, Bedrock, RDS, CloudFront, Amplify, IAM, Route 53), Docker, GitHub Actions
- Frontend: React.js, React Native, Tailwind CSS, Figma (UI/UX)
- Backend & Databases: Django, FastAPI, MongoDB, Node.js, MySQL
- Tools: Git/GitHub, VS Code, Postman,
- Soft Skills: Collaborative mindset, strong problem-solving capabilities & communication skills.

EDUCATION

Bachelor of Computer Engineering (CGPA - 7.52*/10)

2022 - 26

AP Shah Institute of Technology, University of Mumbai

ACHIEVEMENTS & EXTRACURRICULARS

- Participated in 12+ hackathons and actively attending tech community events.
- Design & Publicity Head, Coders Club (Founding team)
- Technical Co-Lead, OJUS – Radiance of Euphoria (APSIT cultural fest)
- Development Head, HackScript 4.0
- Organiser, DataWeb Hackathon

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
 - AWS Academy Graduate - Data Engineering
 - SQL (Intermediate) - HackerRank
 - Google Android Developer Virtual Internship
-
