### SUMMARY

Final-year Computer Engineering student specializing in full-stack development and backend systems, with experience in AI integration and data analysis. Skilled in React, Node.js, Python, Django, and FastAPI, and experienced in designing scalable, production-ready applications. Strong problem-solving abilities, clear communication skills, and a collaborative mindset, demonstrated through internships, live projects, and real-world academic applications.

### EDUCATION

|                                                         |                  |
|---------------------------------------------------------|------------------|
| <b>Senior Secondary Education</b> ( 86.40 % )           | <b>2019 - 20</b> |
| St. Jerome Convent High School                          |                  |
| <b>Higher Secondary Education</b> ( 66.50 % )           | <b>2021 - 22</b> |
| PACE Junior College of Science                          |                  |
| <b>Bachelor of Computer Engineering</b> ( CGPA - 7.52 ) | <b>2022 - 26</b> |
| AP Shah Institute of Technology, University of Mumbai   |                  |

### SKILLS

- Languages: Python , C/C++
- Web Technologies: Javascript, ReactJS, React Native, Tailwind CSS
- Backend & Databases: Django, FastAPI, MongoDB, Node.js, MySQL
- AI & Data Analysis: Python (Pandas, NumPy, Matplotlib), Gemini AI, MS Excel, PowerBI
- Deployment: Docker, Kubernetes, CI/CD
- Tools: Git/GitHub, VS Code, Postman,
- Soft Skills: Collaborative mindset, strong problem-solving capabilities & communication skills.

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                  |                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Software Developer Engineer Intern , Druve Media Pvt Ltd</b> ( <a href="#">druvemedia.in</a> )                                                                                                                                                                                                                | <b>Aug 2025 - Present</b>  |
| <ul style="list-style-type: none"><li>• Built and maintained a modern, production-ready society management system.</li><li>• Created design for multiple products in Figma.</li><li>• Integration of the backend functionality with the frontend .</li><li>• Deliver top-notch product design in time.</li></ul> |                            |
| <b>Software Developer Engineer Intern , EternIQ Pvt Ltd</b> ( <a href="#">eterniq.in</a> )                                                                                                                                                                                                                       | <b>Jan 2025 - Jun 2025</b> |
| <ul style="list-style-type: none"><li>• Developed and maintained responsive web application using React and Node.js.</li><li>• Collaborated with cross-functional teams to deliver features on time.</li><li>• Optimized client-side application performance resulting in 40% faster load times.</li></ul>       |                            |

### ACADEMIC EXPERIENCE & ACHIEVEMENTS

- **Technical Co-Lead** @ OJUS - Radiance of Euphoria (cultural fest of APSIT)
- **Development Head** @ HackScript 4.0 ( inter-college hackathon of APSIT )
- **Design & Publicity Head** @ Coders Club ( founding team )
- **Club Ambassador** @ Data Science & Analytics Club

---

## PROJECTS

---

### **Coder's Hub : online community for Coder's Club (operational at my engineering college) [Live Demo](#)**

- CodersHub is a comprehensive edutech platform and event management system designed for coding clubs and educational organizations.
- It provides event creation, registration management, and attendance tracking with detailed analytics on participant demographics and verification status.
- Built and deployed a centralized platform for **1000+** engineering students to access placement resources.
- Implemented real-time updates and secure authentication with **Supabase**.

### **FOMO - Fraud Observation & Monitoring Operations**

- A system that actively observes, monitors, and flags suspicious or fraudulent activities in real-time, ensuring secure e-commerce transactions and account integrity.
- AI-powered fraud detection system that monitors e-commerce transactions in real time using Django and Gemini AI, identifying suspicious patterns and reducing false positives for improved security.

### **SAKSHAM Society Management Platform (FastAPI, React Router, UI/UX)**

- A SaaS product built under my tenure as an SDE intern at **Druve Media Pvt Ltd**.
- Designed and developed responsive and attractive dashboards for Society management .
- Integrated API data (using Fast API) from the backend to get displayed on the dashboard.

### **PRISM – Risk Scoring Model (FastAPI, Streamlit, Gemini AI)**

- GenAI-powered real-time risk assessment tool with explainable AI outputs.
- Overcome the drawback of traditional loan approving methodologies by integrating artificial intelligence.

---
